

Group Name: T.I.A.		Date: 1/25/10	Convener: R. Borbon	Staff: Binti and Alma
HEAD	HEART	FEET	IEDAS	IDEAS con't
Drawing	Family values	College/University	Ask for opinion but they do not take it into consideration because nothing changes	Some students don't eat or they end up with bad food.
Reading, math, writings, spelling, history, science	Value friendship	Anywhere - no limits - where ambition drives him	Teacher, dean, counselors, security guards ask for you opinion and then when you start saying it they make you be quiet, they want you to say what they want to hear even though	Some teachers are on the phone or texting and don't help students
Common sense	More education	Job/career	Teachers and adults take each others side against students who are telling the truth	Students need to know their rights
Tell time	Pride	Out of the house	When visitors come, teachers act different (nice, pay attention, put up the standards)	Teachers act like they pay attention when they really don't
Responsibility	Accomplishment	Travel	They don't ask for our opinion because it's not in their benefit	Students are doing drugs and security guards act like nothing happens
Be able to drive	Grateful	Strength	Don't judge a students intelligence by their test scores	Give us something to believe in again
Organize money	Independence	Taking the first steps to a better future	Teachers need to be more understanding e.g. family emergencies	Be supportive (teachers/counselors) to go to college, not happening at all
Communication skills	Confidence	Independent	Vandalism hurts the budget, effects learning and students don't feel safe, feel frustrated, makes you wonder why that happens	Some teachers are not aware of what's going on in their class during class time
Manners	Self respect	Grounded	Smaller classrooms to make sure everybody learns the subject well	Stop the budget cuts
Patience	Pride in culture	Brave	Also focus on students that are having a hard time	Teachers don't give chances (e.g. if you fail a test, they don't let you retake
Disciplined	Consciousness		Discrimination against English learners, students have dropped out of school because of teachers treatment	Don't judge a students intelligence by their test scores
	Inspiration		Don't give up on students and send them to Rose City, sets bad example to other students and it doesn't motivate them	Parents and administrators should know how students are treated by faculty at school (not respected, no listened to)
			Get teachers who want to teach, not just get paid	We don't feel comfortable talking to parents about this
			Teachers tell students they don't care about their education they're going to get paid anyways. (All students here have heard a teacher say that) we should be #1 priority	Teacher tried to hit student and then flicked him
			Students are afraid that ELD classes are going to be cut even though the students need a lot of help.	Teachers threaten students with suing and expelling them over innocent things
			Some teachers are supportive of the students work	P.E. teacher physically fought with a student (out of school time)
			When teachers eat in the classroom, students can't focus	When teachers are out of school it effects other students and their grades
			Some teachers punish students by cutting their lunch time	Some substitutes and teachers don't care if students ditch the class.
			Students should be told what are our rights as students	Students should give it all they have
Summary of Priorities				
Read,math,write	Family values	Anywhere ambition drives them	Students should be told what are our rights as students	
More Education	Value friendship	No limits	Parents and administrators should know how students are treated by faculty at school (not respected, no listened to)	
		Out of the house	Teachers tell students they don't care about their education they're going to get paid anyways. (All students here have heard a teacher say that) we should be #1 priority as students
